1. The first part of the paper is devoted to a general
 consideration of the problem. It is shown that the
 problem is of the type of a boundary value problem
 for a second order elliptic equation. The problem
 is then reduced to a problem of the theory of
 integral equations. The second part of the paper
 is devoted to the solution of the problem. It is
 shown that the problem is solvable and that the
 solution is unique. The third part of the paper
 is devoted to the study of the properties of the
 solution. It is shown that the solution is continuous
 and that it satisfies the boundary conditions. The
 fourth part of the paper is devoted to the study of
 the asymptotic properties of the solution. It is
 shown that the solution has a certain asymptotic
 expansion. The fifth part of the paper is devoted
 to the study of the numerical properties of the
 solution. It is shown that the solution can be
 calculated numerically. The sixth part of the
 paper is devoted to the study of the physical
 properties of the solution. It is shown that the
 solution has a certain physical interpretation.

[illegible]

1. *Handwritten text in a cursive script, likely a letter or document. The text is written on aged, yellowed paper. The handwriting is dense and somewhat difficult to decipher, but appears to be in a historical or literary context.*

Ch. 31: Int. 1882. to 1892

2. 22
